Logic

WE MAKE  
BUILDINGS  
BETTER.

WebCTRL®

# SMARTER BUILDINGS START WITH WebCTRL®

When it comes to managing your intelligent building, it's all about having the tools to achieve optimization across all areas. The WebCTRL building automation system (BAS) from Automated Logic was designed to provide exactly that.

From putting intuitive dashboards and reports right at your fingertips to anticipating system issues so technicians can quickly address them, the WebCTRL® BAS gives you the power to monitor and control your building like never before.

Explore how our industry-leading BAS can help you optimize building performance

- Maintain comfort and productivity by controlling your BAS from anywhere
- Deliver operating efficiencies across all areas
- Anticipate system issues before they escalate
- Visualize conditions quickly with intuitive graphics, dashboards and reports
- Integrate building systems using open communication standards

## OPEN STANDARDS MEAN OPEN POSSIBILITIES.

---

With wide-ranging support for major communication protocols, the WebCTRL® BAS unlocks new possibilities for the way you control and optimize your building. Its server software runs locally or in the cloud – and supports a range of database types so you can take full advantage of the latest web technologies and share data with enterprise or third-party systems.

The data collected by WebCTRL® BAS can help with:

- Generation of bills for tenants' off-hours usage
- Automatic generation of building systems' maintenance and work orders
- Demand reduction, by participating in energy rebate programs using the OpenADR 2.0 protocol

## SMARTER CONTROL DOESN'T HAVE TO BE COMPLICATED.

The WebCTRL® BAS puts your entire building right at your fingertips with easy and secure browser-based access from any desktop computer, tablet or cell phone – all without the need for any add-on software. And with its intuitive navigation and graphical user interface, you can respond to alerts or make tweaks and optimizations faster, no matter where you are.

The flexibility of WebCTRL® BAS extends to its functionality as well. It can be scaled to multi-site or multi-server installations, and easily integrates with electrical and mechanical subsystems, including:

- Standby generators
- Lighting systems
- Fire safety systems
- Building elevators
- Security systems

## SAVE YOUR ENERGY – THE FEATURES ARE ALL HERE.

When it comes to balancing comfort and efficiency, information is power. The WebCTRL® BAS makes it easy by providing the native tools to help you measure, analyze and compare data throughout your building.

- **Environmental Index Tool:** Measure, analyze and compare building or zone data in real time

---

- **Indoor Environmental Quality Index:** Provide building occupants with real-time visibility into air quality metrics in their immediate area

---

- **Thermographic Floor Plan Displays:** Quickly view facility-wide comfort and operating conditions

---

- **Time-lapse Graphics:** Play back hours of real-time data in just minutes to assess equipment operations

---

- **Fault Detection and Diagnostics (FDD):** Proactively respond to building issues before they happen

---

- **Customizable Dashboards and Reports:** Monitor the Key Performance Indicators (KPIs) that matter most and gain powerful insights

# WE MAKE BUILDINGS BETTER.

The WebCTRL® BAS is part of a complete intelligent building ecosystem offered by Automated Logic. When it's integrated with the rest of our product offerings, you can unlock even greater results through seamless interactions between all our different solutions.

### ENERGY MANAGEMENT PACKAGE

Unlock greater energy efficiency and maintain sustainability with our easy-to-use reporting software.

### ANALYTICS SOLUTION

Proactively manage assets, prevent downtime, improve efficiency and reduce costs by combining analytics with outcome-based advisory services.

Automate your building for improved comfort and efficiency with our industry-leading building automation solution.

## YOUR BUILDING OFFICIALLY REPORTS TO YOU.

### EnergyReports™ Energy Management Package

The EnergyReports package provides on-the-fly report creation so you can identify areas for improved performance, reduced energy consumption and lower energy costs. Intuitive dashboards and robust scheduling options help you share insights throughout your organization to optimize your building, maintain compliance and drive sustainability initiatives.

## BETTER DATA IS JUST THE BEGINNING.

### IntelliSuite™ Analytics & Services

IntelliSuite Analytics & Services combines cloud-based predictive analytics with outcome-based services to help you do much more than simply balance comfort and efficiency. From automatically detecting opportunities for improvement to helping you execute proactive maintenance strategies, IntelliSuite is designed to help you address a range of change of business challenges – all with fewer resources.

Improved Energy Efficiency

Enhanced Occupant Comfort

Proactive Maintenance

Improved Equipment Efficiency

Asset Optimization

Longer Equipment Life

Reduced Equipment Downtime

## SEE IT ALL FOR YOURSELF.

### A COMMITMENT TO EXCELLENCE THAT CIRCLES THE GLOBE.

At Automated Logic, we've been developing and supporting intelligent building solutions that have helped customers operate their buildings more efficiently for more than 40 years. We take pride in being a global leader in building automation systems and working with customers ranging from small, family-owned businesses to Fortune 500 corporations.

Our headquarters is in Kennesaw, Georgia, but with more than 31 branch locations and 10 corporate offices, in addition to an authorized dealer network with a presence in more than 58 countries, our support is always close by.
